

Design ideas for catalog pages

Door manufacturers + ekey dLine fingerprint scanner

NEW: ekey dLine - smart access with fingerprint scanner

Enjoy smart home convenience at the front door

Your finger as a key

Make sure you can unlock the door any time. Keys, cards or codes can be lost, misplaced or forgotten — your finger is always on hand!

Maximum security

Only authorized persons can open the door with the ekey dLine fingerprint scanner. An ekey dLine fingerprint scanner is 1,000 times more secure than the 4-digit number code of an ATM card.

NEW: Remote opening

Never again have to wait to let the handyman into the house. In an emergency, you can unlock the door from anywhere — be it from the office, on the go or on vacation!

NEW: Voice assistant

Connect your ekey dLine fingerprint scanner to Amazon Alexa and simply open the door with a voice command.

NEW: Push notifications

No more uncertainty! You receive a notification on your smartphone as soon as your loved ones come home.

NEW: Flexibly expandable system

With the ekey dLine, you don't have to determine the scope of your access control system in advance. Functions, users and devices can be added at a later date.

ekey dLine fingerprint scanner for door leaf

- Touch operation
- 4-segment light ring for optical signaling
- With design element in stainless steel gray
- With ekey bionyx app
- Integrated in the door leaf
- With power supply 230 VAC/24 VDC/2 A
- 1 relay
- Access control system is administered via smartphone or tablet

PRODUCT NOVELTY

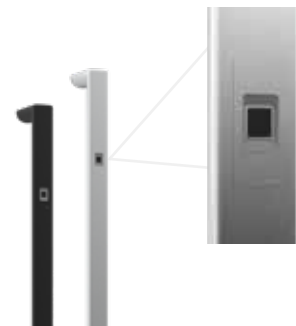

ekey dLine - smart access with fingerprint scanner

ekey presents a fingerprint scanner system that makes house doors smart: the ekey dLine. The door gets new functions and adapts to your needs.

Experience a new feeling of comfort! Open the front door safely and conveniently with your finger. Smart features that make everyday life easier. An access control system for your wishes for today, tomorrow and beyond.

Discover the advantages of the ekey dLine and experience new possibilities!

"Thanks to ekey, I no longer have to worry whether my child has arrived home safely from school. I automatically get a message on my smartphone as soon as my young daughter has unlocked the door with the fingerprint scanner!" - **Barbara (37)**

"ekey has definitely made my everyday life easier! For example, I can now let the handyman into the house even though I'm not at home yet. So I don't have to rush home to open the door for him. The handyman can start work right away." - **Max (42)**

The advantages of the ekey dLine fingerprint scanner

Discover the advantages of the ekey dLine and experience new possibilities!

"I can finally leave the house without a key. This is particularly useful for outdoor activities such as cycling or jogging. I always have my hands free and just open our front door with my finger!" - **Marlene (28)**

"Thanks to ekey, I no longer have to worry whether my child has arrived home safely from school. I automatically get a message on my smartphone as soon as my young daughter has unlocked the door with the fingerprint scanner!" - **Barbara (37)**

Convenient access for the whole family

Your finger your key

Push notifications

Unlocking on the go

Open the front door conveniently with a voice command

Grant temporary access authorizations for service providers

Flexibly expandable system

PRODUCT NOVELTY

“When we cook for our friends, we have enough to do in the kitchen. We’re glad our front door is connected to Alexa. That way, we can unlock it at any time by voice command and don’t have to walk to the door when our guests ring the bell.”

- **Miriam and Paul (27 and 33)**

“ekey has definitely made my everyday life easier! For example, I can now let the handyman into the house even though I’m not at home yet. So I don’t have to rush home to open the door for him. The handyman can start work right away.” - **Max (42)**
